

FROM SOMETHING TO SOMETHING ELSE

Are you curious about the future?

A good place to start is to look at what is happening around us.

The observations can be gathered in trends.

A trend is a development from something to something else.

A trend describes a movement.

FROM INDUSTRIAL TO PLANETARY

After the fourth industrial revolution does not come a fifth, but a more holistic, value-based and planetary revolution.
Built on better awareness of energy as a force.

FROM MORE TO BETTER

Success is not "more" but "better".

From measuring everything in more, bigger or faster, to measuring better, quality, and real positive impact on ourselves and our environment.

FROM CONFORMIST TO REBEL

With a mentality as a conformist, you think that your task is to maintain, repair and expand what is. The rebels change things completely, challenge the systems & rules and what we are used to, and smash the old.

A photograph of a glass of iced tea with a lemon slice on the rim, placed next to a metal sign that reads "GO LIFE". The sign is made of thin metal rods and is positioned on a wooden surface. The background is slightly blurred, showing some greenery.

FROM PENSION TO BREAKS

We want a life that is not like our parents. In the past, people worked for 40-50 years, then retired and died. Pension is 3 generations old and belongs to the industrial community.

We need a system allowing breaks throughout life.

FROM CLOSED HIERARCHY TO OPEN COMMUNI-TEAMS

Knowledge is no longer something that is bestowed from the top and dosed down the organization. Knowledge is absorbed from all sides.

It is a showdown with the expert and the boss who knows everything. Modern leadership is about daring to expose oneself to blind spots and inviting curiosity and intuition in.

FROM DOMINANCE TO DUALISM

We are made up of both feminine and masculine energy. The masculine energy has been dominant for centuries. Now is the time to create balance by training the feminine energy and our power of balancing the both.

FROM ONE TO THREE BOTTOM LINES (ESG)

The industrial community focused on one bottom line. We now understand that we need to focus on all 3 – the environmental, the social (humans) and the governance (economic) bottom lines. We must find out how we create growth in new ways - a new capitalism.

FROM OUTER TO INNER SUSTAINABILITY FIRST

We made 17 global goals (SDG) for external sustainability, it just wasn't enough. We have found out in recent years that the inner human sustainability drives the outer.

We have new skills to learn.

FROM AUTOMATIC TO AI-MAGICAL

Where we before had to choose between non-scalable service with soul or automatic service without soul, we will see an amalgamation of both in "AI magic" solutions. We want to experience tailor-made service with soul that gives us the coveted wow experience.
